DONZI DUDZ

# DONZI

## FROM THE PRESIDENT...

It's with great pleasure we introduce to you the new Donzi Marine and bring you our exciting model line up for 1995.

We are extremely proud of our new flagship, the 33ZX, which sets a new standard for design and comfort in an offshore hi-performance cruiser.

Our innovative Medallion Series is breaking new ground with the introduction of our 275 mid-berth cruiser.

We've developed a new, hi-tech construction process we call FIST, Fiberglass Integrated Structural Technology. It's the highest standard today for the construction of sport boats.

Last, but not least, the Donzi Classics are back and better than ever, with improved details and finishing.

I personally invite you to our factory, to see the new Donzi Marine, all of our new boats for '95 and to find out why Donzi is called "America's Favorite Boat."

*Ken Hall*

## INTRODUCING A COMPANY THAT DOESN'T NEED AN INTRODUCTION... DONZI MARINE.

**A HERITAGE SECOND TO NONE.** It's been 30 years since racing legend Don Aronow put his first Donzi in the water. Little did anyone know that his designs would forever change the boating world. Aronow was considered "The King of Thunderboat Row," a street in Miami where all the major boat builders set up shop. His original deep-vee powerboats

offered more performance than any of the competition, and his designs became the basis of an entire industry. Aronow was known for his brand of offshore punishment and for demanding the most from his hulls. This is evident by the long string of racing victories won by Aronow, including the famous 1965

Miami to Nassau race which he ran in record time. Because of the way his boats hounded drivers during a race, they became known in racing circles as those "Damned Donzi's". Thirty years later, the nickname remains. Today, the new Donzi Marine is in many respects similar to the old. We've formed The Donzi Design Team which is leading the industry in product design and development with our

Medallion Series. Medallions are innovative boats built around the concept of combining great performance, style and value within a design that will withstand the test of time. All Medallion sport boats feature removable modular interiors. A boat owner knows that the first thing to wear out on a boat is the interior. Donzi has solved that problem by designing all seats, cushions, side panels, carpet, etc., to remove easily for storage or replacement. Donzi backs that up with a \$1,500 certificate towards the replacement of a new interior package within 5 years. This certificate is transferable with the boat adding to its resale value. All Medallions come loaded with standard features that others consider options. Donzi has also introduced an innovative new construction process called FIST- Fiberglass Integrated Structural Technology. Simply put, FIST is a superior boat building process that uses a

fiberglass stringer system and high density Divinylcell Foam coring instead of wood. The result is a hull

that's stronger, yet lighter. It adds rigidity, safety, and eliminates wood stringers that usually rot and break loose. All hull compartments are filled with flotation foam adding strength, sound dampening, and safety. Donzi's that are constructed with our FIST technology, carry with them a 10-year hull warranty that's transferable with the boat. All models feature MaxGuard Gelcoat for improved shine and resistance to cracking, UV stable and rot resistant vinyls, and much more. Donzi has also led the industry with its new Limited Edition 22 Blackhawk. A customized version of their famous 22 Classic, it utilizes Mercury's newest innovation in engine propulsion- the 502 EFI Magnum engine coupled with the Blackhawk Twin Prop Surface Piercing Drive. Custom features include a Jaguar styled dash with double lens VDO gauges and a designer-style steering wheel. All cowl vents, hinges, cleats, ski tow eye, fuel fill and vent, through-hull hardware, and lift rings are 24-karat gold plated. Even the through-hull exhaust vents are 24-karat gold plated! Each issue features a custom graphics package, that is airbrushed with Imron - no decals of any type are used. A magnificent hawk, a symbol of speed, strength, and agility, graces the flawless finish of the deck. Only 40 signature models will be built, and to date nearly all have sold. Another performance breakthrough is evidenced by our newest flagship - the Donzi 33ZX. The Donzi Design Team has taken the concept of

a hi-performance racer, and completely restyled the exterior to reflect a design that showcases today's sense of refinement. We then designed an interior that's nothing

short of spectacular. A large, integral sliding companionway door, leads to a spacious interior that's the largest of any boat in its class. We've given it luxurious appointments that are usually found on much larger yachts, such as luminous etched glass bulkheads, cabin accent lighting, a full galley and enclosed head, ultra suede headliner, and much, much, more. In keeping with Donzi racing heritage, a prototype of this boat took second place in this year's Cannonball Run- a grueling 1200 mile race from Miami to New York, beating out all the other hi-performance builders in its class. The Donzi 33ZX is the new generation of hi-performance, offshore racers. But today's Donzi won't stop there. Our engineers and designers are working overtime to introduce innovative new designs, continued refinements in construction and details, and to push the envelope in speed and performance. It's our commitment to you, and to the memory of Don Aronow, to continue the tradition of keeping Donzi in the forefront of the boating world and to keep Donzi's heritage as "America's Favorite Boat!"

# **CLARION MARINE AUDIO. OUR PARTNER IN SOUND.**

Good boating and good music just naturally go together. That's why Donzi has selected Clarion as the sound system of choice for our 95 models. Clarion Marine Audio has engineered a line of audio systems expressly designed for the marine environment. Critical electronic components are specially coated to resist moisture and corrosion for long service life. Clarion marine speakers are acoustically engineered for open air use, ensuring superior clarity of highs and lows, not obtainable with typical car speakers. So enjoy your days on the water with Donzi and Clarion.

### 85 YEARS OF ENDURING PERFORMANCE.

FROM ITS VERY FIRST MARINE ENGINE BUILT IN 1907, VOLVO PENTA HAS BECOME SYNONYMOUS WITH DEPENDABLE PERFORMANCE. IN 1954, IT INTRODUCED THE FIRST PRODUCTION TURBO-CHARGED DIESEL ENGINE. AND IN 1983, IT ONCE AGAIN LED THE INDUSTRY-INTRODUCING THE REMARKABLE DUAL PROP TWIN COUNTER-ROTATING PROPELLER SYSTEM. LEGENDARY ADVANCES FROM A POWERFUL PERFORMER.

# DONZI MEDALLIONS

## PARTNERS IN POWER

# AND VOLVO PENTA.

**Volvo Penta is the perfect power match for Donzi's Medallion Series.** The enduring performance and dependability of Volvo Penta marine power make these boats quick to plane, with responsive acceleration, while achieving top-end speed. The New SX Series combines legendary Volvo Penta technology with a revolutionary design. Every SX features a break-away vertical shaft coupling, the Volvo Penta developed cone clutch and helical-cut, pattern-matched gears.

Volvo Penta's 135 horsepower Model 3.0 GS sterndrive, is a marlinized four cylinder GM block and features lightweight, compact designs for smaller installation spaces, and remarkable fuel economy for lower operating costs. For quiet, dependable power that's great for running about or skiing, the perfect performance can be found in Volvo Penta's V-6 sterndrives. These GM 4.3 liter, 180 to 185 propshaft horse power engines offer impressive low-end power and high-end speed, so you can run with the best. Models feature a counter-balance shaft for smooth, quiet operation.

Volvo Penta EFI V-8's, combined with the new SX drive or Duoprop, give our performance sport boats low-end torque and high-end performance. Electronic Fuel Injection delivers turnkey starts, smooth and reliable idling, responsive acceleration, and reduced fuel consumption. Plus, it features overspeed protection, altitude compensation and self-diagnostics.

Put a patented Duoprop twin propeller sterndrive behind you and you'll outperform a comparably powered single prop sterndrive or outboard every time. Duoprop outdrives deliver greater acceleration, up to 30% better fuel economy and unequalled maneuverability. The counter-rotating twin propellers feature 60-70% more blade area for increased traction. Handling and docking are also greatly improved, making it easier to maneuver in tight areas. Duoprop's unique design allows you to achieve your desired speed with fewer RPM - resulting in greater fuel economy and increased engine life.

Volvo Penta offers worry-free boating at its best. With the industry's first factory 2-year limited warranty on all engines and drives, you can simply sit back and enjoy your Donzi.

Donzi's Medallion Series and Volvo Penta - it's a combination that will accelerate your boating pleasure, time after time after time.

# INTRODUCING A DRAMATIC COMBINATION OF LUXURY & PERFORMANCE.

**THE 33ZX BY DONZI**

## WITHOUT COMPROMISE.

**LUXURY & PERFORMANCE.** Those two words best describe Donzi's new 33ZX. A full size companionway door leads to the largest interior of any boat in its class. The spacious dining area can accommodate four adults, with plenty of elbow room to spare. The 33ZX boasts a full galley complete with freshwater sink, electric stove, refrigerator, lots of storage, and ample counter space to prepare those special meals. A large, enclosed head with shower makes excursions comfortable for you and your guests. There's loads of storage throughout, plus a host of other luxurious features usually found on much larger boats. But even more impressive is what you'll find

on the outside- A custom dash and racing wheel made of burled wood, McLeod custom power seats that adjust to cruising or racing modes, zero effort racing throttles for complete control at your fingertips. Plus, the custom Imron painting process will get you noticed even while standing still. But don't forget, the 33ZX is all performance. With twin 502 MerCruiser power she'll reach speeds up to 65mph, with all the stability and tracking that Donzi's are famous for. No other 33' hi-performance racer can make these same claims - but then, only this boat is the 33ZX from Donzi.

# INTRODUCING A DRAMATIC NEW WAY OF BOATING.

**THE 182, 210, 212 & 275.**

## THE DONZI MEDALLIONS.

**COMFORT, PERFORMANCE & STYLE.** When was the last time you can recall a new boat that was developed and designed around a truly innovative concept? Probably not for a long time. But that's exactly what Donzi has done with its new Medallion Series. From the keel up, the Medallion Series

is unique and different from anything else in the market today. The Donzi Design Team came up with the idea of combining a contemporary styled exterior, with a highly functional modular interior, utilizing state-of-the-art construction, delivering a boat that is timeless, with all the options built-in as standards. Thoughtful details are designed in everywhere, such as pop-up cleats, a glove box, drink holders, plenty of storage and more. Checkout the dashboard. Its surface is mahogany veneer bonded to aluminum, and sealed with epoxy resin for a deep luster finish. This dash, with its analog gauges and chrome bezels, incorporates Donzi's classic appeal with a very hi-tech boat.

The custom wraparound windshield offers distortion-free vision. Its raked back lines are the sleekest around, rivaling that of a European sports car. Storage is everywhere. Our cuddy cabin and mid-berth models feature the largest interiors of any boats in their class, with standard amenities usually found as options on much larger vessels. When it comes to performance, these boats are 100% pure Donzi. Easily reaching speeds up to 50 mph with big-block power, they give you a smooth, comfortable, dry & stable ride. The Medallions are constructed utilizing FIST -

Fiberglass Integrated Structural Technology. This process incorporates extremely strong, biaxial stitched-woven fiberglass with high density Divinylcell foam coring - Completely eliminating wood!

No wood to rot, weaken, or cause any structural problems as the vessel ages. Spending more time on the water and less time cleaning and tending to "normal" wear and tear items is every boaters goal and the Donzi Design Team has hit the mark. All Medallion sport boats feature modular interior components that securely lock into the molded fiberglass cockpit. When not in use, seat cushions and upholstered panels can be easily removed and stored out of the weather, leaving nothing but a rugged fiberglass cockpit to the mercy of the elements. On top of all this, the 182, 210, & 212 Medallions come with a certificate worth \$1,500 towards the purchase of a new interior package. This includes the upholstered panels, seat cushions, carpeting, and boot striping, in any choice of available colors. This certificate is valid for a 5-year period from the date of original delivery, is transferable

to a second owner, and may be redeemed at any Donzi dealership or direct through Donzi Marine. Comfort, performance, style, re-sale, and value. Only a Medallion brings you everything you could want in one boat, and only Donzi brings you the Medallions.

This spacious cabin has a 6'2" V-berth that converts to a large dining table for 4 adults. A complete galley offers a fresh water sink, built-in ice box, and a butane stove. There's a portable marine head & plenty of storage.

The interior of the 275 is the largest in its class, with 6'3" of headroom and comfortably sleeps 4 adults. A full galley with fresh water sink, built-in ice box, and electric stove are standard. There's a fully enclosed head with shower and a comfortable mid-berth.

## THE MEDALLION 152 JET BOAT.

**FAST & FUN.** What would happen if you crossed a wave runner with a speed boat? You'd get Donzi's 152 Jet Boat. A racy new concept boat that begins where the personal watercraft leaves off. Sleek molded-in twin consoles, with the instrumentation of a sports car, flow smoothly into padded wrap-around seating with ample room for 3 adults. Hit the throttle and her SportJet engine will whisk you away at over 40mph in as little as 4" of water. See that wake over there? Go on and take it...the 152 can. Tight turns, 360's, fast, fun, that's the reason we built this hi-tech machine. The hot tub style bow seating is comfortable for 2 adults or 3 kids. An oversized aft sunning pad lets you rest in comfort when you just want to drift along and enjoy the sun. There's plenty of dry storage in the stern for gear you don't want to get wet. Pop-up cleats keep the boat obstacle free so you won't stub your toes when moving about. So join the jet set, and join in the fun with Donzi.

# REINTRODUCING A SPEED BOAT WHOSE TIME HAS COME... AGAIN.

**THE 16, 18 & 22 CLASSICS.**

## THE DONZI CLASSICS.

**LONG & LEAN.** Swift & seaworthy. Beautiful & graceful. Sleek & stylish. These words describe the Donzi Classics, boats that epitomize pure speed-boat design. Reaching speeds in excess of 60mph, the Classics turn heads even when standing still. Built to take the demands put on world class racers, they are the unequivocal leaders of any boats in their class. Tracking like they're on rails, Classics respond quickly to the helm. Their deep-V hull designs allow for excellent maneuverability on both calm and choppy

waters. Performance is only part of the Classic's story. Quality construction shows in every inch of these boats. Premium resins and tri-axial fiberglass are rolled into meticulously detailed molds - even the graphics are gel-coated in, not taped on. This starts the process that ends in the finish Donzis are famous for. The cockpit upholstery is made from

premium grade, UV stable vinyl for long life and top-stitched for extra strength and styling detail. All carpeting and seat cushions snap in and out for easy storage, and there's plenty of room in the bow for skis and accessories. The Donzi hardware used throughout contributes greatly to the overall look of these boats. All cleats, grab rails, and ski tow eye, are made from

top quality stainless steel. Hatch hinges and cowl vents are chrome plated for a high profile racing look. Even the Phillips-head screws are all turned to the same position on the stainless steel rub rail. Now that's Donzi detail! Custom Donzi gauges grace an instrument panel

that is wired via a circuit breaker electrical system- you won't have to worry about blowing fuses. A racing style steering wheel completes the look of these classic dashes. Finally, every Classic is buffed and re-buffed to a perfect finish. This completes the smooth look and finish that Donzi is famous for. It's been 30 years since Don Aronow created the classics, but even today these timeless beauties turn heads and make your heart race as they speed by. They take you back to a time when you promised yourself that one day you're "going to own a Donzi." Maybe it's time to make good on your promise to own a Donzi- America's Favorite Boat.
